La **guarnizione TPS** viene utilizzata, con successo di lunga data, su **pistoni monoblocco di cilindri idraulici a doppio effetto**. Per la sua concezione rappresenta un'ottima soluzione tecnica ed economica poichè garantisce un'eccellente

tenuta in presenza di mediie ed alte pressioni di esercizio e ne semplifica la lavorazione delle parti metalliche. É disponibile in due versioni - **TPS/G** e **TPS/T** che si differenziano sia per il profilo dell'anello centrale di tenuta che per composizione dei materiali. Mentre la **TPS/G** è composta da 5 elementi (una parte centrale in **NBR**, due anelli di supporto in **materiale termoplastico** e due anelli di guida in **acetico**), la **TPS/T** è formata da 3 elementi con l' anello centrale di tenuta in **gomma telata**. I particolari materiali con cui sono prodotte assicurano un basso attrito anche in presenza di elevate pressioni. Possono essere realizzate con materiale speciale, adatte per alte temperature.

CARATTERISTICHE GENERALI

Facilità di montaggio
Elevata resistenza all'abrasione
Elevata resistenza all'estrusione
Basso valore di deformazione

APPLICAZIONI

- Macchine da costruzione
- Carrelli elevatori
- Macchine per lo stampaggio a iniezione
- Macchine agricole
- Sollevatori
- Cilindri standard
