Уплотнение TRU изготовленное из **прорезиненной ткани** используется для поршней цилиндров двустороннего действия. Его особенный профиль обеспечивает хорошую герметичность и долговечность, а его прочность делает его пригодным для цилиндров с несовершенной доводкой.

ОБЩИЕ ХАРАКТЕРИСТИКИ

Простота установки
Устойчивость к истиранию
Устойчивость к экструзии
Низкое значение деформации
