La **guarnizione stelo TSE** è indicata per la **tenuta su steli di cilindri idraulici**. È formata da unico pezzo nato dalla [vulcanizzazione](#) di due materiali: **gomma telata** quale supporto anti-estrusione e **NBR** quale parte di tenuta.

Oltre alla versione **TSE** sono disponibili altre versioni:

- **TSE/AI** con anello anti-estrusione sul diametro interno, particolarmente adatto in condizioni di esercizio gravose ed in presenza di elevate tolleranze di accoppiamento
- **TSE/AE** dotata di un anello esterno, può essere montata su pistoni di cilindri a semplice effetto

Inoltre può essere realizzata con materiale speciale adatto alle alte temperature.

CARATTERISTICHE GENERALI

- Facilità di montaggio
- Elevata resistenza all'abrasione
- Elevata resistenza all'estrusione
- Basso valore di deformazione

APPLICAZIONI

- Macchine movimento terra
- Macchine agricole
- Veicoli industriali
- Cilindri standard
- Gru
