La guarnizione TSE/AI è indicata per la tenuta su steli di cilindri idraulici e svolge una funzione di tenuta a singolo effetto. La guarnizione TSE/AI è costruita in due pezzi il primo nato dalla vulcanizzazione di due materiali: gomma telata quale supporto anti estrusione e NBR quale parte di tenuta.

La guarnizione TSE/AI ha un anello anti estrusione sul diametro interno, particolarmente adatto in condizioni di esercizio gravose ed in presenza di elevate tolleranze di accoppiamento.

Oltre alle versioni standard, può essere realizzata con materiale speciale adatto per alte temperature.

CARATTERISTICHE GENERALI

- Facilità di montaggio
- Elevata resistenza all'abrasione
- Elevata resistenza all'estrusione
- Basso valore di deformazione

APPLICAZIONI

- Macchine movimento terra

- Macchine agricole
- Veicoli industriali
- Cilindri standard
- Gru
