La corda è realizzata per estrusione ha sezione QUADRATA e come i KANTSEALS garantiscono la tenuta con la deformazione della propria sezione, altra caratteristica è quella con la loro forma di evitare di ruotare su se stessi. La giunzione degli estremi della corda può essere fatta con collanti, tenendo presente il materiale che la costituisce.

CARATTERISTICHE GENERALI

- possibilità di personalizzare le dimensioni

APPLICAZIONI

- La principale applicazione della corda è simile a quella degli O-rings.
- E' usata come guarnizione statica con diversi campi di applicazione.
