Anelli di Guida/Nastro POLIESTERE mantengono in asse il sistema cilindro **Tessuto+Resina poliestere**.

Gli anelli guida in resina poliestre sono realizzati per il **montaggio sia su pistoncini che su steli di cilindri idraulici a semplice e a doppio effetto**. A differenza dei comuni anelli in resina acetilica (vedi AGIAGE), sono prodotti in resina poliestere che garantisce **elevata capacità al carico radiale/assiale**. Principalmente utilizzati in cilindri telescopici frontali, gru per camion e macchine movimento terra, sono particolarmente adatti in presenza di condizioni di esercizio gravose quali disallineamenti e vibrazioni.

CARATTERISTICHE GENERALI

Facilità di montaggio
Elevata resistenza all'abrasione
Elevata resistenza all'estrusione
Basso valore di deformazione
